

E-LEARNING COURSES WE OFFER

SGS BUNDLED COURSES

Whether you are new to your field and learning your role, or you are looking to strengthen your core skills within your organisation, SGS Bundled Courses will provide you with access to the training you need. These courses can be completed at your own pace and in any order. Save money with our course bundles and get the most out of your time with SGS.

FLEXIBLE AND COST-EFFECTIVE DIGITAL LEARNING FOR YOUR PROFESSIONAL DEVELOPMENT

Additional discounts are available for multiple participants and payment can be made in local currencies. All eLearning courses come with 365-day access, so you can complete the training at your own pace, track your performance, view your assessment results, and generate and download your completion certificate. In addition, you can access reports and view your learning history at any time.

BENEFITS OF DIGITAL LEARNING

- Workers gain new skills and learn new behaviors that enhance your business
- The learning experience is personalized
- Employees control when, where and how learning takes place
- Staff can be reached across multiple sites
- Workers in remote locations feel more connected
- Results are trackable and measurable

WHY CHOOSE SGS ACADEMY?

As a world leader in professional training, drawing on years of worldwide experience and a unique global reach, we offer the best in professional development training. Our courses cover a wide range of industries and are taught by experts in their fields. We provide training for the world's largest companies and government organizations.

E-LEARNING COURSES WE OFFER

S#	Course Title	Cost plus 5% tax
Package # 01		
1	API 580 - Risk Based Inspection	50,000
2	API 653 Aboveground Storage Tanks Inspection, Repair, Alteration and Re-construction	
3	API 578 - Material verification for New and existing alloy piping systems	
4	API 574 - Inspection of piping system components	
Package # 02		
5	API 570 In-service piping inspection part 1	35,000
6	API 570 In-service piping inspection part 2	
7	API 510 In-service pressure vessel part 1	
8	API 510 In-service pressure vessel part 2	
Package # 03		
9	Welding Inspection	50,000
10	Introduction to Metal Defects and its types	
11	Introduction to Non-Destructive Testing, its Types and Application	
12	Advanced NDT Techniques and its applications in industry	
Package # 04		
13	Dye Penetrant Testing Technique	60,000
14	Ultrasonic Testing Technique	
15	Radiographic Testing Techniques	
16	Magnetic particle inspection Techniques	
17	Vacuum Box Testing	
18	Hydrostatic Testing	
Package # 05		
19	Asset Integrity Management	60,000
20	Failure Investigation and Root Cause Analysis	
21	Reliability centered maintenance	
22	Condition Monitoring Techniques and Their Applications	
23	Mechanical Integrity and Safety of Industrial Boilers	
24	Cathodic Protection system Design, installation and troubleshooting	
Package # 06		
25	Safe use of scaffolding	20,000
26	Safe Use of Forklift	
Package # 07		
27	Defensive Driving	30,000
28	Fire Safety and Fire Warden	
29	First Aid and CPR	
Package # 08		
30	Rules for Life	30,000
31	Hazard Identification Risk Assessment (HIRA)	
32	Slip Trip and Fall prevention	
Package # 09		
33	SGS Inspection process	20,000
34	General Inspection Reporting	
Package # 10		
35	ASME Section V	25,000
36	ASME SEC IX
