

# Steam & Condensate Network Audits: Unlock Efficiency with SGS

**At SGS, we understand the critical role that steam, and condensate systems play in industrial operations. Our Steam & Condensate Network Audits are designed to empower your business with insights to enhance efficiency, reduce costs, and elevate performance**

# Key features of our audits

## STEAM GENERATION ANALYSIS

- Boiler thermal & combustion efficiency assessment
- Recommendations for optimization of boiler operating points
- Recommendations for improvement of steam quality
- Recommendations for further heat recovery

## STEAM DISTRIBUTION NETWORK INSPECTION

- Piping design checks
- Insulation integrity assessment
- Recommendations for condensate & non-condensable gas removal
- Steam leakage assessments

## CONDENSATE RECOVERY SYSTEM EVALUATION

- Piping design checks
- Steam trap assessments

## Why choose SGS?

### EXPERTISE

Our team comprises seasoned professionals with extensive experience in steam and condensate systems across various industries.

### ACCURACY

We conduct thorough audits, examining every aspect of your steam generation, distribution, end-use and condensate recovery systems.

### CUSTOM SOLUTIONS

We recognize that every facility is unique. Our audits are customized to address your specific challenges and goals.

### GLOBAL REACH

By identifying inefficiencies and recommending optimization strategies, we help you minimize energy waste and lower operational costs.

### RELIABILITY ENHANCEMENT

Our recommendations aim to improve the reliability and performance of your steam and condensate systems, reducing downtime and enhancing productivity.

## Benefits for your business:

- Increased Energy Efficiency
- Cost Reduction Opportunities
- Enhanced System Reliability
- Improved Productivity
- Sustainable Operations

## Let's elevate your operations together

Don't let inefficiencies hold your business back. Partner with SGS for a comprehensive industrial Steam & Condensate Audit today. Contact us to schedule your audit and unlock the full potential of your steam and condensate systems.
