

# REACH Application for Juvenile Products in the EU

## BACKGROUND

The REACH Regulation (Registration, Evaluation, Authorization and Restriction of Chemicals) applies to substances that are on their own, in mixtures or in articles. Special attention should be given to the Candidate List of substances of very high concern (SVHCs) for authorization and restricted substances falling under Annex XVII as these two lists of substances are subject to different requirements.

LATEST UPDATE: JULY 2023

## OBLIGATIONS FOR RESTRICTED SUBSTANCES UNDER ANNEX XVII

Article 68 - Annex XVII will be amended by adopting new restrictions or amending current restrictions to address unacceptable risks to human health or the environment arising from the manufacture, use or placing on the market of substances on their own, in mixtures or in articles. Unless restrictions are met, regulated products should not use/contain the restricted substances under Annex XVII. Please be informed that the listed requirements in this document are for products covered by Regulation (EC) 1907/2006 on REACH. They do not cover additional EU member state legislation.

**OBLIGATIONS FOR SVHCs ON CANDIDATE LIST\***

**1. ARTICLE 31: DUTY TO COMMUNICATE INFORMATION ON SUBSTANCES IN MIXTURES**

Suppliers of a substance that appears on the Candidate List have to provide a safety data sheet (SDS) for the substance to their customers. Suppliers of a mixture not classified as dangerous according to Regulation (EC) 1272/2008 on the Classification, Labelling and Packaging of Substances and Mixtures (CLP Regulation) have to provide the recipients on request, with a safety data sheet (SDS) if the mixture contains at least one substance on the Candidate List, present in at least 0.1% for non-gaseous mixtures or 0.2% for gaseous mixtures.

**2. ARTICLE 33: DUTY TO COMMUNICATE INFORMATION ON SUBSTANCES IN ARTICLES**

Suppliers of an article containing any SVHC on the Candidate List with a concentration above 0.1% shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of the substance.

Equivalent information should be supplied to consumers (the general public) if it is requested. The supplier has the duty to provide this information within 45 days upon receipt of this request.

**3. ARTICLE 7(2): NOTIFICATION ON ARTICLES**

EU Importers and EU manufacturers of articles containing substances that appear on the Candidate List may need to submit a notification to ECHA if the substance is present in the article above a concentration of 0.1% weight by weight (w/w) and the total amount of the substance in the articles exceeds one tonne per year.

*\*Beginning January 5, 2021, suppliers of articles containing SVHCs on the Candidate List in a concentration of more than 0.1% are obliged to submit information on these articles to the Substances of Concern In articles as such or in complex objects (Products) (SCIP Database) – an obligation established under amended Directive 2008/98/EC (Waste Framework Directive, WFD).*
