

# Fumigation and pest management

Trusted.  
Independent.  
Committed.

**SGS**

High-quality, tailored solutions for all your pest-related problems.

## Pest-related solutions

Insects and pests can adversely impact your business. Contaminated products can result in loss of quality and added disposal costs. With SGS by your side, we can reduce your risk of contamination and preserve your reputation and brand image. Registered under the Department of Agriculture Registrar of Pesticides, our pest control solutions can protect your premises, products, and goods, ensuring your business meets the appropriate quality, health, and safety regulations.

### Fumigation solutions

Safeguard your commodities from insects and pests. With expert services registered with the Australian Quarantine and Inspection Services, the British Pest Control Association, and the Sri Lankan Department of Agriculture, we ensure the protection of your products.

Whether in storage, transport, or in-house, our mobile teams prevent insect and mite-related risks and damage throughout the supply chain. We cover silos, warehouses, ships, barges, trains, trucks, flour mills, breweries, and more.

Using bio-risk assessments and gas-free measurements, we can unearth the presence of any pests in your cargo. We can then fumigate stored goods and apply biocide treatment. Our ventilation services – and non-toxic pest control systems – will ensure that these treatments don't have an adverse effect on your commodities.

From delivering standard fumigation services to developing customized fumigant solutions, our in-depth understanding of the issues involved: the treatments, methodologies, and regulations, make us the ideal partner to prevent and mitigate risk to your commodities and finished products.

### Pest control solutions

Our pest management solutions offer security to the processing industry, warehousing facilities and logistics organizations.

To prevent and eliminate the threat of insects and rodents at every stage of the supply chain and throughout the production process, we offer an integrated pest management service, including the monitoring and management of pests, odorless/spraying/larvicidal/fogging treatments, and drilling and chemical injecting mechanisms for pests in existing structures.

With our services, we can protect your business from a variety of pests, including

- Household pests (cockroaches and ants)
- Wood-boring insects (termites)
- Rodents
- Flies
- Moths & beetles
- Millipedes and centipedes
- Arachnids
- Mosquitos

# Specialized solutions for hotels, resorts and residential buildings

Proactive pest control is imperative. It is not only because of vulnerability to pest threats, but also because of the impact they can have on the reputation of a business. It is essential to create a pleasant and safe environment for residents and guests by ensuring it is free from pest infestation. If not monitoring, a hotel, resort, or residential building can suffer from the potential spread of disease and food contamination.

## Specialized solutions for hotels and resorts

We can protect your guests and the reputation of your hotel. We offer three ranges of treatments for pest control, including:

- Rodenticide Treatment (e.g. laying of rat bait)
- Insecticide Treatment (e.g. spraying insecticide)
- Flying Insects Control (e.g. spraying, fogging)
- Guest Areas, e.g., all guest rooms, washrooms, balconies, and closets.
- Public Areas, e.g., banquet facilities, hallways, lobby/front desks, , restrooms, gift shops, changing rooms.
- Employee-Only Areas, e.g., utility rooms, workshops and engineering areas
- Kitchen and Restaurant Areas, e.g., all food and beverage outlets
- Garden and Exterior, e.g., garden, yard, patio spaces, driveway, parking areas, etc.

## Residential Treatment Packages

Our resident packages include an one of our professionally trained technicians, who will be on call at your location 24 hours a day, 7 days a week.

These individual specialists routinely perform general pest management treatments, such as:

- Baiting stations, spraying and fogging
- Kitchen and canteen fly control and treatments
- Daily/weekly inspections for pest sightings

As standard, we provide our dedicated equipment to your site, including all other necessary materials and chemicals. Sufficient supplies will also be kept on site at all times, ensuring peace of mind in the event of an arising emergency.

## Eco-Friendly Treatments

We also provide an Integrated Pest Management Service. This specialized solutions utilizes less harmful pest control methods and support our goal to be more sustainable and eco-friendly.

We are SGS – the world’s leading testing, inspection and certification company. We are recognized as the global benchmark for sustainability, quality and integrity. Our 97,000 employees operate a network of 2,650 offices and laboratories, working together to enable a better, safer and more interconnected world.
