CARGO TREATMENT SERVICES FOR ENHANCED CRUDE OIL AND PETROLEUM PRODUCTS

MEET YOUR CARGO SPECIFICATIONS

WITH ENHANCING TREATMENTS FROM SGS

Today's highly competitive trading environment demands a flexible approach to meet the contractual and physical limitations of oil commodities. Through our Cargo Treatment Services, we supply specialist additive services to oil traders around the world to correct deficiencies that affect cargo handling, safety and contractual obligations.

From laboratory bench blending in order to identify the most cost-effective treatment, to the physical supply and addition of chemicals to the cargo, and to the independent certification of the treated cargo on completion of treatment, we are there to add value and margin to all your oil cargoes.

Regardless of whether the method of adding additives is on-board drumming, direct line injection, or in-tank blending, we have the facilities to overcome even the steepest obstacles.

We maintain a wide portfolio of additive suppliers. They are selected for the quality and performance of their products, together with their ability to deliver large stocks over long distances on a rapid-response basis.

Our comprehensive range of additives includes, among others:

- CFPP improvers
- Cloud point improvers
- Pour point depressants
- Lubricity improvers
- Cetane and octane improvers
- H₂S scavengers
- Biocides
- Dyes
- Dehazers and demulsifiers
- Static dissipators (Stadis 450)
- Anti-oxidants

Each year we treat in excess of 40 million metric tons of crude oil and petroleum products operating in Europe, Russia and the former Soviet Union, the Middle East, South East Asia, West Africa, and North and Central America. No one else has the same geographical coverage, available additive stocks, equipment and port access.

WHY SGS?

SGS is the world's leading inspection, verification, testing and certification company. Recognised as the global benchmark for quality and integrity, we employ over 64 000 people and operate a network of more than 1 250 offices and laboratories around the world.

We are constantly looking beyond customers' and society's expectations in order to deliver market leading services wherever they are needed.

We provide innovative services and solutions for every part of the oil, gas and chemicals industry. Our global network of offices and laboratories and our dedicated team allow us to respond to your needs, when and where they occur. Our reputation for independence, excellence and innovation have established us as the market leaders in providing services that improve efficiency, reduce risk and deliver competitive advantage for you.
